Making a Case for Hands-Off, Student-Led Research in Alternative Settings

Amy Barfield, Program Specialist
The GLOBE Implementation Office, UCAR, Boulder, CO
barfield@ucar.edu

By combining data collection with recreational activities, removing the structure of a traditional classroom setting, and giving the students complete control over their projects, the students had fun and engaged in their research in a more memorable way.

The GLOBE Program
Global Learning and Observations to Benefit the Environment (GLOBE) is an international science and education program that provides students and the public worldwide with the opportunity to participate in data collection and the scientific process, and contribute meaningfully to our understanding of the Earth system and global environment.
